

## Bostrom 915

The Bostrom 915 (T-Series HiPro) seat has proven durability and comfort and is suited best for medium to heavy duty flat floor trucks such as Kenworth, Freightliner, Western Star and International. The 915 has a greater height range than the LoPro (910) of 150mm making it an ideal seat for the American style trucks. It has a working capacity up to 150Kg

With its scissor action air suspension and flexible cushion support system (vs a pan style support system) it delivers superior weight distribution and reducing cushion compression, both providing a more stable driving platform so you can drive longer.
